Young professional looking to find a full-time position in software development. Easily adaptable, team player, and eager to learn; I am always looking for a new challenge and will apply myself to whatever opportunity is presented to me.

PROFESSIONAL EXPERIENCE

Bell Flight   **Hurst, TX**
Product Cybersecurity Engineer   *July 2023 – Present*

- Researched and helped developed cybersecurity architecture for the Bell Future Long Range Assault Aircraft (FLRAA) program
- Aided in the development and research of T3 Requirements for various subsystems for dPDR with government
- Actively collaborated with Integrated Product Teams(IPTs) for integration and interfacing of service oriented architecture

Textron Systems   **Cockeysville, MD**
Aerospace Engineering Intern   *May 2022 – August 2022*

- Undertook autopilot development and integration for unmanned air systems
- Developed tools for flight test analysis using MATLAB, JavaScript, HTML, and Excel
- Reduced subscale testing workflow by 25%, resulting in increased workflow & hours saved per flight test

Textron Aviation   **Wichita, KS**
Propulsion Engineering Intern   *May 2021 – August 2021*

- Researched and identified a root cause for the Fuel System on the Longitude line of aircraft utilizing a flight database
- Examined and adjusted tolerances for holes in the ribs of the fuel tank in CATIA V6 to account for flaws in production & revising drawings for an upcoming XLS+ block point change
- Met weekly with Propulsion team to discuss project updates and goals for the group

EDUCATION

Texas A&M University   **College Station, TX**
Bachelor of Science in Aerospace Engineering   *May 2023*
Minor in Computer Science
